JOURNAL OF MOLECULAR CATALYSIS

Author Index

Augustine, R.L., see Tanielyan, S.K. 267

Badrieh, Y., Blum, J. and Schumann, H.
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231

Balcar, H. and Petrusová, L.
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135

Bencze, L. and Szilagyi, R.
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2 \cdot GaBr_3$ 157

Bernhard, P., see Mühlebach, A. 143

Bespalova, N.B., Bovina, M.A., Sergeeva, M.B., Oppengeim, V.D. and Zaikin, V.G.
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21

Blum, J., see Badrieh, Y. 231

Bossuyt, A.R., see Verpoort, F. 43

Bovina, M.A., see Bespalova, N.B. 21

Bühler, N., see Mühlebach, A. 143

Butenko, T.A., see Bykov, V.I. 111

Bykov, V.I., Butenko, T.A., Finkel'shtein, E.Sh. and Henderson, P.T.
Synthesis of monoene pheromone components having a double bond in positions 6–11 using cometathesis of cycloolefins with α-olefins 111

Cavell, K.J., see Seen, A.J. 245

Chipara, M., see Dimonie, M. 117

Coca, S., Dimonie, M., Dragutan, V., Ion, R., Popescu, L., Teodorescu, M., Moise, F. and Vasilescu, A.
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101

Coca, S., see Dimonie, M. 117

De Boer, H.J.R. and Royan, B.W.
Electronic effects in alkene polymerization catalyzed by substituted *bis*(indenyl)zirconium complexes and methylalumoxane 171

De Lima, J.B., see Do Nascimento Filho, J.C. 257

Dimonie, M., see Coca, S. 101

Dimonie, M., Coca, S., Teodorescu, M., Popescu, L., Chipara, M. and Dragutan, V.
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117

Do Nascimento Filho, J.C., De Lima, J.B., Dos Santos Lima Neto, B. and Franco, D.W.
Trans-effect and *trans*-influence series for phosphanes in octahedral environment: a guide for design of new catalysts 257

Dos Santos Lima Neto, B., see Do Nascimento Filho, J.C. 257

Dragutan, V., see Coca, S. 101

Dragutan, V., see Dimonie, M. 117

Du Plessis, J.A.K., Van Sittert, C.G.C.E. and Vosloo, H.C.M.
$[CpMo(CO)_3]_2$ as a catalyst for olefin metathesis 11

Ellison, A. and Overton, T.L.
Characterisation of modified Cr–silica catalysts 81

Fiermans, L., see Verpoort, F. 43

Finkel'shtein, E.Sh., see Bykov, V.I. 111

Foltynowicz, Z., see Marciniec, B. 125

Foltynowicz, Z., see Marciniec, B. 213

Franco, D.W., see Do Nascimento Filho, J.C. 257

Fujita, M. and Fukuzumi, S.
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225

Fukuzumi, S., see Fujita, M. 225

Furuki, M., see Kawai, T. 1

Gibson, V.C., see James Feast, W. 87

Grubbs, R.H., see Wu, Z. 39

Guliński, J., see Marciniec, B. 213

Hammer, J., see Thorn-Csányi, E. 15

Henderson, P.T., see Bykov, V.I. 111
Hodges, A.M., see Seen, A.J. 245
Hong, L. and Ruckenstein, E.
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
Imagawa, Y., see Ohkubo, K. 355
Ion, R., see Coca, S. 101
Ishida, H., see Ohkubo, K. 355
Ishikawa, T., see Kawai, T. 1
Ivin, K.J., see James Feast, W. 87
James Feast, W., Gibson, V.C., Ivin, K.J., Kenwright, A.M. and Khosravi, E.
Metathesis polymerization of 1,7,7-trimethylbicyclo[2.2.1]hept-2-ene using a well defined molybdenum initiator 87
Karlen, T., see Mühlebach, A. 143
Kawai, T., Furuki, M. and Ishikawa, T.
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
Kazansky, V.B., see Vikulov, K.A. 61
Kenwright, A.M., see James Feast, W. 87
Khosravi, E., see James Feast, W. 87
Krauss, H.L., see Xing, Q. 75
Kraxner, P., see Thorn-Csányi, E. 15
Kucherov, A.V. and Slinkin, A.A.
Solid-state reaction as a way to transition metal cation introduction into high-silica zeolites 323
Lewandowski, M., see Marciniec, B. 125
Ludi, A., see Mühlebach, A. 143
Maciejewski, H., see Marciniec, B. 213
Marciniec, B., Foltynowicz, Z. and Lewandowski, M.
Metathetical activity of allylsubstituted silanes in the presence of ruthenium catalyst 125
Marciniec, B., Foltynowicz, Z., Pietraszuk, C., Guliński, J. and Maciejewski, H.
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
Mau, A.W.-H., see Seen, A.J. 245
Milius, W., see Xing, Q. 75
Moise, F., see Coca, S. 101
Mol, J.C., see Vikulov, K.A. 61
Mol, J.C.
Metathesis of unsaturated fatty acid esters and fatty oils 185
Mühlebach, A., Bernhard, P., Bühler, N., Karlen, T. and Ludi, A.
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo*,*exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
Nakashima, T., see Ohkubo, K. 355
Ohkubo, K., Urata, Y., Seri, K., Ishida, H., Sagawa, T., Nakashima, T. and Imagawa, Y.
Esterase activity of catalytic IgG and IgM antibodies for the hydrolysis of *p*-nitrophenyl acetate 355
Oppengeim, V.D., see Bespalova, N.B. 21
Overton, T.L., see Ellison, A. 81
Peng, K. and Xiao, S.
Studies on methylaluminoxane and ethylene polymerization 201
Petrusová, L., see Balcar, H. 135
Pflug, K.P., see Thorn-Csányi, E. 29
Pflug, K.P., see Thorn-Csányi, E. 69

Popescu, L., see Coca, S. 101
Popescu, L., see Dimonie, M. 117
Rodríguez-Reinoso, F., see Sepúlveda-Escribano, A. 291
Royan, B.W., see De Boer, H.J.R. 171
Ruckenstein, E., see Hong, L. 303
Sagawa, T., see Ohkubo, K. 355
Schaverien, C.J.
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by $[Y(C_5Me_5)(OC_6H_3^tBu_2)(\mu\text{-}H)]_2$ 177
Schumann, H., see Badrieh, Y. 231
Seen, A.J., Cavell, K.J., Mau, A.W.-H. and Hodges, A.M.
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
Sepúlveda-Escribano, A. and Rodríguez-Reinoso, F.
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
Sergeeva, M.B., see Bespalova, N.B. 21
Seri, K., see Ohkubo, K. 355
Shelimov, B.N., see Vikulov, K.A. 61
Slinkin, A.A., see Kucherov, A.V. 323
Steinhäusler, T. and Stelzer, F.
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
Stelzer, F., see Steinhäusler, T. 53
Szilagyi, R., see Bencze, L. 157
Tanielyan, S.K. and Augustine, R.L.
Pd/Sn catalyst for toluene acetoxylation 267
Teodorescu, M., see Coca, S. 101
Teodorescu, M., see Dimonie, M. 117
Thorn-Csányi, E., Kraxner, P. and Hammer, J.
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products

with *p*-phenylenevinylene sequences 15
Thorn-Csányi, E. and Pflug, K.P.
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially available neodymium butadiene rubber 29
Thorn-Csányi, E. and Pflug, K.P.
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
Urata, Y., see Ohkubo, K. 355
Van Sittert, C.G.C.E., see Du Plessis, J.A.K. 11
Vasilescu, A., see Coca, S. 101
Verdonck, L., see Verpoort, F. 43
Verpoort, F., Fiermans, L., Bossuyt, A.R. and Verdonck, L.
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
Vikulov, K.A., Shelimov, B.N., Kazansky, V.B. and Mol, J.C.
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
Vosloo, H.C.M., see Du Plessis, J.A.K. 11
Wu, Z. and Grubbs, R.H.
Synthesis of perfect rubber using ring-opening metathesis polymerization of 1-methylcyclobutene 39
Xiao, S., see Peng, K. 201
Xing, Q., Krauss, H.L. and Milius, W.
Surface compounds of transition metals. Part XXXIX[1]. Redox deactivation of Phillips catalysts: from olefins to cyclopentadienyl complexes 75
Zaikin, V.G., see Bespalova, N.B. 21

Journal of Molecular Catalysis 90 (1994) 371–376

JOURNAL OF MOLECULAR CATALYSIS

Subject Index

acetoxylation
Pd/Sn catalyst for toluene acetoxylation 267
activated carbon
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
Aliquat 336
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231
alkenes
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
alkoxides
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by $[Y(C_5Me_5)(OC_6H_3^tBu_2)(\mu\text{-}H)]_2$ 177
alkoxylated derivatives
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
alkylation
$[CpMo(CO)_3]_2$ as a catalyst for olefin metathesis 11
alkylbenzenes
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225
allyl derivatives
Metathetical activity of allylsubstituted silanes in the presence of ruthenium catalyst 125
alumina
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
butadiene
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially available neodymium butadiene rubber 29
carbene
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
carbenes
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\cdot GaBr_3$ 157
carbon monoxide
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
carbonylation
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231
carbonyl complexes
$[CpMo(CO)_3]_2$ as a catalyst for olefin metathesis 11
carboxylic acids
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
chromium
Characterisation of modified Cr–silica catalysts 81
cyclooctene
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
cycloolefins
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101
cyclopentadiene
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent

tungsten chlorides as unicomponent catalysts 135
cyclopentadienyl complexes
[CpMo(CO)$_3$]$_2$ as a catalyst for olefin metathesis 11
Surface compounds of transition metals. Part XXXIX[1]. Redox deactivation of Phillips catalysts: from olefins to cyclopentadienyl complexes 75
cyclopropane
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
deactivation
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
depth profiling
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
dienes
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by [Y(C_5Me_5)($OC_6H_3^tBu_2$) (μ-H)]$_2$ 177
dimerization
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
[CpMo(CO)$_3$]$_2$ as a catalyst for olefin metathesis 11
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
1,4-divinylbenzene
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
diynes
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231
electron transfer
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225
esterase activity
Esterase activity of catalytic IgG and IgM antibodies for the hydrolysis of *p*-nitrophenyl acetate 355
esters
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
Metathesis of unsaturated fatty acid esters and fatty oils 185
ethene
Characterisation of modified Cr–silica catalysts 81
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
ethenolysis
Metathesis of unsaturated fatty acid esters and fatty oils 185
ethylene
Studies on methylaluminoxane and ethylene polymerization 201
fatty acids
Metathesis of unsaturated fatty acid esters and fatty oils 185
homogeneous catalysts
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21
hydroformylation
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
hydrogenation
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
hydrolysis
Esterase activity of catalytic IgG and IgM antibodies for the hydrolysis of *p*-nitrophenyl acetate 355
immobilized catalysts
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
immunoglobulins
Esterase activity of catalytic IgG and IgM antibodies for the hydrolysis of *p*-nitrophenyl acetate 355
iron
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
isomerization
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
kinetics
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and

ruthenium content in polymers 143
lanthanide chemistry
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by $[Y(C_5Me_5)(OC_6H_3^1Bu_2)(\mu\text{-}H)]_2$ 177
magnesium
Studies on methylaluminoxane and ethylene polymerization 201
mechanism
Metathesis polymerization of 1,7,7-trimethylbicyclo[2.2.1]hept-2-ene using a well defined molybdenum initiator 87
metathesis
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially available neodymium butadiene rubber 29
Synthesis of perfect rubber using ring-opening metathesis polymerization of 1-methylcyclobutene 39
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
Metathesis polymerization of 1,7,7-trimethylbicyclo[2.2.1]hept-2-ene using a well defined molybdenum initiator 87
Synthesis of monoene pheromone components having a double bond in positions 6–11 using cometathesis of cycloolefins with α-olefins 111
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
Metathetical activity of allylsubstituted silanes in the presence of ruthenium catalyst 125
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
Metathesis of unsaturated fatty acid esters and fatty oils 185
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
10-methylacridinium ion
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225
methylaluminoxane
Studies on methylaluminoxane and ethylene polymerization 201
methylcyclobutene
Synthesis of perfect rubber using ring-opening metathesis polymerization of 1-methylcyclobutene 39
modified catalysts
Characterisation of modified Cr–silica catalysts 81
molecular mechanics
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\cdot GaBr_3$ 157
molybdena
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
molybdenum
$[CpMo(CO)_3]_2$ as a catalyst for olefin metathesis 11
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
Metathesis polymerization of 1,7,7-trimethylbicyclo[2.2.1]hept-2-ene using a well defined molybdenum initiator 87
Metathesis of unsaturated fatty acid esters and fatty oils 185
Mo-promoted Fe/activated carbon catalysts for carbon monoxide hydrogenation 291
monoene
Synthesis of monoene pheromone components having a double bond in positions 6–11 using cometathesis of cycloolefins with α-olefins 111
Nafion
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
neodymium
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially

available neodymium butadiene rubber 29
nickel
Ethene dimerization using a Nafion® supported σ-arylnickel(II) species 245
norbornene
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
norbornene derivatives
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
octahedral environment
Trans-effect and *trans*-influence series for phosphanes in octahedral environment: a guide for design of new catalysts 257
oils
Metathesis of unsaturated fatty acid esters and fatty oils 185
olefins
$[CpMo(CO)_3]_2$ as a catalyst for olefin metathesis 11
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
Surface compounds of transition metals. Part XXXIX[1]. Redox deactivation of Phillips catalysts: from olefins to cyclopentadienyl complexes 75
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101
Synthesis of monoene pheromone components having a double bond in positions 6–11 using cometathesis of cycloolefins with α-olefins 111
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by $[Y(C_5Me_5)(OC_6H_3^tBu_2)(\mu\text{-}H)]_2$ 177
Studies on methylaluminoxane and ethylene polymerization 201
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
organic layer coating
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
oxygenation
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225
palladium
Pd/Sn catalyst for toluene acetoxylation 267
paracyclophanediene
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
phase transfer conditions
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231
phenylenevinylenes
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially available neodymium butadiene rubber 29
phenylenevinylene units
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
pheromone components
Synthesis of monoene pheromone components having a double bond in positions 6–11 using cometathesis of cycloolefins with α-olefins 111
Phillips catalysts
Surface compounds of transition metals. Part XXXIX[1]. Redox deactivation of Phillips catalysts: from olefins to cyclopentadienyl complexes 75
phosphanes
Trans-effect and *trans*-influence series for phosphanes in octahedral environment: a guide for design of new catalysts 257
phosphine ligands
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
photoinduction
Oxygenation of alkylbenzenes, catalyzed by 10-methylacridinium ion via photoinduced electron transfer under visible light irradiation 225
photoreduction
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
p-nitrophenyl acetate
Esterase activity of catalytic IgG and IgM

antibodies for the hydrolysis of *p*-nitrophenyl acetate 355
polycondensation
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
polymerization
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
Synthesis of perfect rubber using ring-opening metathesis polymerization of 1-methylcyclobutene 39
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
Characterisation of modified Cr–silica catalysts 81
Metathesis polymerization of 1,7,7-trimethylbicyclo[2.2.1]hept-2-ene using a well defined molybdenum initiator 87
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
Alkoxides as ancillary ligands in organolanthanide chemistry: synthesis, reactivity, α-olefin and diene polymerization by $[Y(C_5Me_5)(OC_6H_3^tBu_2)(\mu\text{-}H)]_2$ 177
Studies on methylaluminoxane and ethylene polymerization 201
porphyrinates
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101
rhenium
Dimerization and isomerization of 2-methyl-1-alkenes over Re_2O_7–Al_2O_3 catalyst 1
rhodium
Further observations on $RhCl_3$–Aliquat 336® catalyzed carbonylation of aromatic diynes under phase transfer conditions 231
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
ring opening
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
Synthesis of perfect rubber using ring-opening metathesis polymerization of 1-methylcyclobutene 39
Optically active polymers via ring-opening metathesis polymerization: Polymerization of enantiomerically pure (−)-*endo*-2-norbornenyl acetate 53
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
rubber
Metathetic incorporation of preformed defined *p*-phenylenevinylene sequences into commercially available neodymium butadiene rubber 29
ruthenium
Metathetical activity of allylsubstituted silanes in the presence of ruthenium catalyst 125
Ring opening metathesis polymerization of bicyclo [2.2.1]hept-2-ene (2-norbornene) and *exo,exo*-5,6-bis(methoxycarbonyl)-7-oxabicyclo [2.2.1]hept-2-ene using Ru(II) and Ru(III) complexes: Polymerization kinetics and ruthenium content in polymers 143
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
Trans-effect and *trans*-influence series for phosphanes in octahedral environment: a guide for design of new catalysts 257
silanes
Metathetical activity of allylsubstituted silanes in the presence of ruthenium catalyst 125
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
silica
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
Deactivation mechanism of photoreduced and cyclopropane-treated molybdena/silica catalysts for olefin metathesis 61
Characterisation of modified Cr–silica catalysts 81

Pd/Sn catalyst for toluene acetoxylation 267
Immobilization of alkoxylated phosphine ligands and their Rh complexes to a silica surface coated with an organic mono- or multilayer 303
silicon-containing catalysts
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21
simulation
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2 \cdot GaBr_3$ 157
stereoselectivity
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
structure
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2 \cdot GaBr_3$ 157
supported catalysts
Pd/Sn catalyst for toluene acetoxylation 267
surface characterization
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
surface compounds
Surface compounds of transition metals. Part XXXIX[1]. Redox deactivation of Phillips catalysts: from olefins to cyclopentadienyl complexes 75
tin
Pd/Sn catalyst for toluene acetoxylation 267
toluene
Pd/Sn catalyst for toluene acetoxylation 267
tungsten
Ring-opening copolymerization of [2.2]paracyclophane-1,9-diene (PCPDE) and cyclooctene (COE); a route to soluble products with *p*-phenylenevinylene sequences 15
Cross-metathesis of some functionalized olefins with cyclo- and bicycloolefins catalyzed by WCl_6–silicon-containing co-catalyst systems 21
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
Synthesis of oligo- and poly(1,4-phenylenevinylene) by metathetic polycondensation of 1,4-divinylbenzene 69
Ring-opening polymerization of cycloolefin induced by tungsten porphyrinates 101
Stereoselectivity of cycloolefin polymerization with WCl_6-based catalytic systems 117
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2 \cdot GaBr_3$ 157
unicomponent catalysts
Cometathesis of dicyclopentadiene with esters of unsaturated carboxylic acids by high valent tungsten chlorides as unicomponent catalysts 135
vinylsubstituted silanes
Metathesis of vinylsubstituted silanes in the presence of ruthenium complexes 213
XPS
Olefin metathesis catalyst. Part I. Angle-resolved and depth profiling XPS study of tungsten oxide on silica 43
X-ray crystallography
Molecular mechanical studies on olefin metathesis reaction. Part 2: Modelling of $\{W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2\}_2$ and $W[\overline{C(CH_2)_3CH_2}](OCH_2\text{-}t\text{-}Bu)_2Br_2 \cdot GaBr_3$ 157
